

Expert 24 Quick Start Guide

Important: Do NOT connect the Expert 24 to your computer until after you have installed the USB driver!

- 1** Insert the Expert 24 CD in to your PC. If your PC has auto-run enabled the Expert 24 Setup menu will appear. If no menu appears, open 'My Computer' (Computer in Windows Vista/Windows 7) browse to your CD drive and double left click on the Expert24Setup icon.

2 The Expert 24 Setup menu will appear automatically

- 3** Left click on the 'Install Driver' option, press yes to continue and a window will appear ask you to confirm that the expert 24 is not connected to your computer, press OK and after a few seconds another window will appear informing you that the USB driver has installed successfully.

4 A message will appear telling you that the printer driver is installing and a 'Hardware Installation' window will appear warning that the driver has not been digitally signed by Microsoft; it is safe to ignore the message and press 'Continue Anyway'

- 5** After a few seconds a message will appear to inform you that the driver installation is complete

6

You can now plug your USB cable in to the Expert 24 and connect it to your PC.

7

On connecting your USB cable to your PC a 'Found New Hardware Wizard' will appear. Select the option to let Windows 'Install the software automatically' and press next.

8

Another 'Hardware Installation' window will appear warning that the driver has not been digitally signed by Microsoft, it is safe to ignore the message and press 'Continue Anyway'.

9

Your driver will now install. Once it appears you can press the 'Finish' button.
